/ ABOUT FCO :

FCO (estd. 2011) is an Indian company that started with a vision to cater to the global safety market with an array of effective, innovative products along with re-launching of the classic products in the era of latest technology. Voila! The generation next of safety products is here! At FCO, we are engaged in manufacturing, marketing, training, consultancy of fire extinguishing apparatus and fire prevention apparatus, burglary/theft detection, alarm systems and a range of safety and security products. We are bound to provide our consumers the newer of the newest, safer of the safest, better than the best and the latest safety and security products. We, at FCO are committed to providing happier, safer and worry-free lives. FCO 2000 is the next generation series of fire suppression system which is light weight, compact in size and extremely easy to use. The cost-effective pricing of our products makes it possible for everyone to afford to protect themselves and their possessions from the irrecoverable damage a fire can cause to life and property.

/ PRODUCT INFORMATION AND OPERATION :

FCO Fire Suppression System consists of a heat-sensitive tube made of a special plastic material, sealed with stainless steel fittings on both ends. This tube serves a dual purpose by functioning as both a storage unit for the extinguishing agent and a detection mechanism. Consequently, there is no need for an additional storage device such as a cylinder. The FCO Fire suppression System utilizes a clean agent to ensure efficient fire suppression.

The FCO Fire suppression system operates independently, detecting high temperatures without relying on an external power supply. When the temperature within the protected enclosure surpasses a critical threshold, a specialized plastic tube in the system melts at the point of maximum temperature. This melting process creates an opening through which the entire stored extinguishing agent is released, effectively targeting the source of the fire.

/ APPLICATION :

- ▶ Vehicle Engine Compartment
- ▶ Server Racks
- ▶ Forestry Machines
- ▶ Electrical Panels
- ▶ CNC Machines
- ▶ Electricity Distribution Box
- ▶ Power Generators
- ▶ Marine Engines
- ▶ Special Army & Police Vehicle
- ▶ 3D Printers
- ▶ Battery Cabinet
- ▶ Telecom Tower Shelters
- ▶ School vans & Ambulance

/ FEATURES :

Light Weight

Recyclable Residue

Compact In Size

Electrically Non Conductive

Automatic Activation

5 Years Warranty

Mobile

No Cleanup Required

Non Toxic

No Maintenance Required

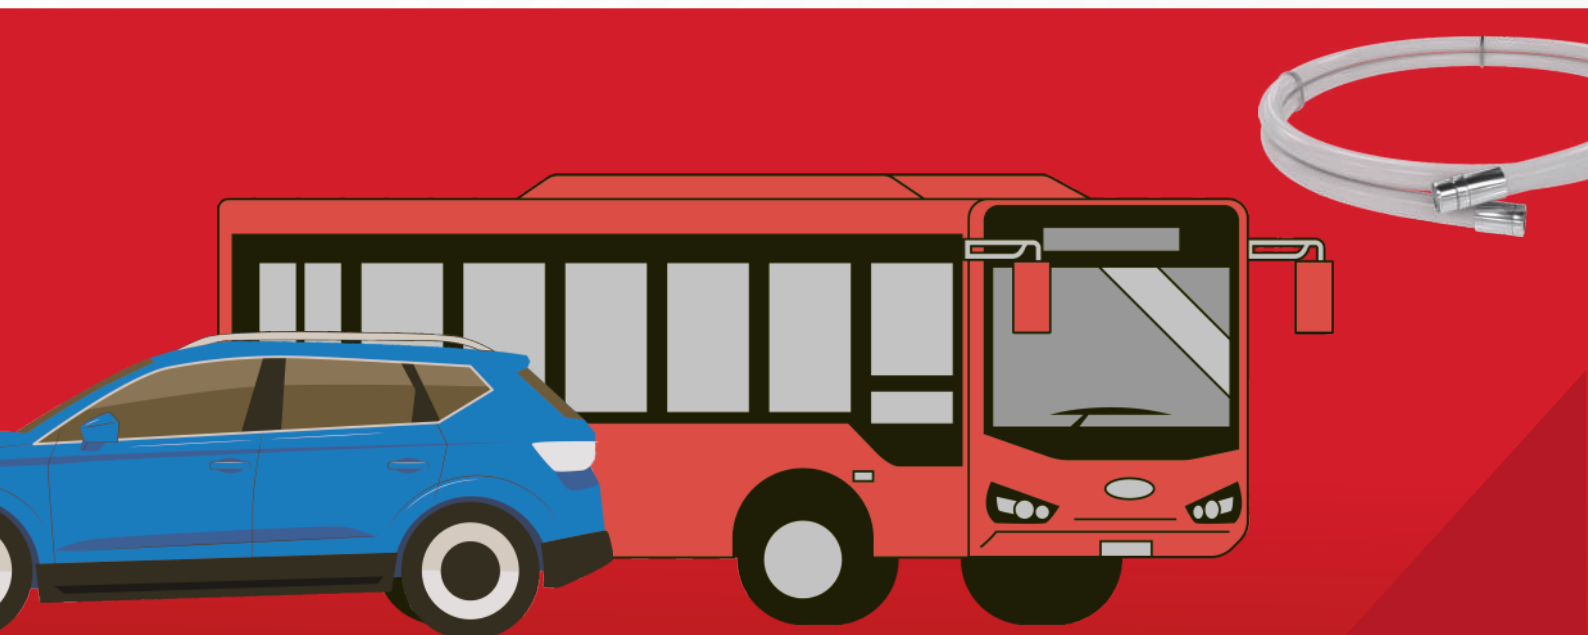

Not Hazardous

Works On Most Types Of Fires A, B, C, E

Ozone Friendly

PRODUCT SPECIFICATION

Length of tube	Agent capacity in kg
1 meter	0.25 kg
2 meter	0.50 kg
3 meter	0.75 kg
4 meter	1.0 kg
5 meter	1.25 kg
6 meter	1.50 kg
7 meter	1.75 kg
8 meter	2.0 kg

Working Temperature 120°C for vehicle engine compartment, Genset, CNC & other machines
80°C for Electrical Panel, Distribution Box, Server Rack
